

# BLV COACHING

Unlocking Opportunities with Vision Technology Coaching.

## PERSONALIZED COACHING

We provide 1:1 individualized assistive technology support for blind and low vision students. Our flexible approach helps students, parents, and support staff work together to build skills and independence.

## SUPPORTING VISION TEACHERS

LEARNstyle's training supports vision teachers by enhancing delivery of the Expanded Core Curriculum (ECC). We work together to give students the tools and confidence they need to succeed in school and beyond.

## PROFESSIONAL DEVELOPMENT

Along with direct coaching, we offer professional learning sessions for Vision Itinerants and teaching staff. These sessions focus on more than just device use – they provide strategies to help students build independence, speed, and problem-solving skills. Training can be customized to fit the technologies used in your board.

## CNIB PARTNERSHIP

By blending CNIB's innovative solutions with LEARNstyle's expertise in strategy-based training, we help students and educators make the most of assistive tools at school and at home. Together, we create opportunities for learning, independence, and success across Canada.
